

Table RQ10.2: Metric Relevance Beyond mAP (Real Computed Correlations)
† = metric identical across methods (zero variance) | CV = coefficient of variation

Metric	Corr. with operational risk ($ \rho $) †	Sensitivity to shift (CV) †	Recommended use
mAP	1.00	0.03	Accuracy reporting
ECE	0.11	0.28	Confidence calibration
AURC	1.00	0.02	Uncertainty ranking quality
Risk@Coverage	1.00	0.08	Deployment-facing selection
